# HTTP Request Pipeline

# HTTP Request Pipeline

# Overview

**Static routes**

**Serving files**

**HTTP methods**

**Parameterized routes**

**Route groups**

# Static Routes

```
router := gin.Default()           // create a router

router.GET("/hello/world", func(c *gin.Context) {
    c.String("Hello, world!")
})
```

# Serving Single Files

```
router := gin.Default()           // create a router

router.StaticFile({URL path}, {path to file})
router.StaticFile("/favicon.ico", "./public/img/favicon.ico")
```

# File Servers

```
router := gin.Default()           // create a router
```

```
router.Static({base URL path}, {path to served directory})  
router.Static("/static", "./public")
```

```
router.StaticFS({base URL path}, {http.FileSystem to serve})  
router.StaticFS("/static", http.Dir("./public"))
```

# HTTP Methods

```
// HTTP/2 message headers
:method = GET
:scheme = https
:path = /users
host = vacationtrack.info
<snip>
```

# HTTP Methods

```
// HTTP/2 message headers
:method = GET
:scheme = https
:path = /users
host = vacationtrack.info
<snip>
```

```
router := gin.Default()
router.GET({URL Pattern},
    func(c *gin.Context){
        ...
    },
)
router.POST(...)
router.PUT(...)
router.DELETE(...)
router.PATCH(...)
router.HEAD(...)
router.OPTIONS(...)
router.Handle(httpMethod, ...)
router.Any(...)
```

◀ **GET**

◀ **POST**

◀ **PATCH**

◀ **HEAD**

◀ **OPTIONS**

◀ **Arbitrary method**

◀ **Any HTTP Method**

# Parameterized Routes

// <https://vacationtrack.info/employees/ajane>

```
router.GET("/employees/:username", func(c *gin.Context) {  
    username := c.Param("username")           // ajane  
})
```

// <https://vacationtrack.info/employees/ajane/timeoff/scheduled>

```
router.GET("/employees/:username/*rest", func(c *gin.Context) {  
    username := c.Param("username")           // ajane  
    rest := c.Param("rest")                   // timeoff/scheduled  
  
    wholeroote := c.FullPath()                 // /ajane/timeoff/scheduled  
})
```

# Route Groups

```
https://vacationtrack.info/admin/users  
https://vacationtrack.info/admin/roles  
https://vacationtrack.info/admin/policies
```

```
router := gin.Default()  
g := router.Group("/admin", ...gin.HandlerFunc)  
g.GET("/users", ...)  
g.GET("/roles", ...)  
g.GET("/policies", ...)
```

# Summary
